ARCHITECTURAL SURFACES

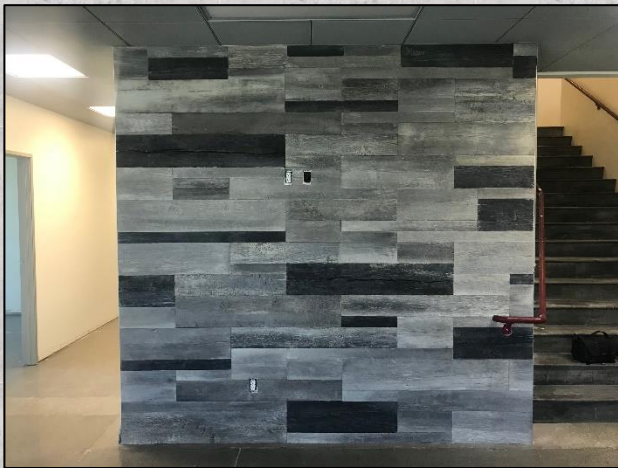

ELEMENTS Thin Architectural Surfaces

SLIM. SIMPLE. STRONG.

Elements Architectural Surfaces a division of Fast Access was created to allow for a slim, simple, and strong alternative to natural vintage wood plank. After installing similar products for nearly three decades, the processes associated with over layment products have been limited. This propelled the formation for anew revolutionary product and process that would alleviate the need for artistry in the field and allow for a quick amazing natural look with a realist feel.

ABOUT OUR PRODUCTS

All our products are manufactured in the United States and are created utilizing our patented Proprietary Modified Flexible Concrete mix design, this allows for the slim profile and ease of installation, while maintaining amazing strengths. While having a realistic look and feel Elements Old Plank Adheres to multiple surfaces, vertical and horizontal. Elements hand crafted Proprietary Modified Flexible Cement Meets ASTM requirements as noted in our product specification.
